

PRESS RELEASE

NOVELLE, LLC RECEIVES AWARD UNDER DHA'S OMNIBUS IV MILITARY RESEARCH AND DEVELOPMENT ID/IQ CONTRACT (HT001121R004)

Novelle is pleased to announce that we, along with our bidding partner Cherokee, have received an award under the DHA's OMNIBUS IV Contract (solicitation HT0011-21-R-004).

OMNIBUS IV is DHA's primary vehicle to provide a broad range of health-related research and development and support services that are of specific interest to the United States Department of Defense (DoD) and the Military Healthcare System (MHS). The primary NAICS code for this acquisition is 541714: Research and Development in Biotechnology (except Nanobiotechnology). The DHA plans to acquire Health R&D Services under a range of Product Service Codes (AN11-AN15) that apply to Basic Research (AN11), Applied Research (AN12), Experimental Development (AN13), R&D Administrative Expenses (AN14), Expenses for R&D Facilities and Major Equipment (AN15), as well as support services to enhance the execution of contract services requirements.

"We are pleased that the DHA has afforded Novelle, and our team, this opportunity. OMNIBUS IV provides Novelle with a small business vehicle to showcase our depth of experience in military research and development and our unique abilities in program management that are critical to the success of complex contract execution and delivery". Rita Simmons, Sr Business Developer, Novelle, LLC.
